

Dialogue & The Art of Thinking Together

A Programme in Strategic Transformation for Leaders

In organisations people spend up to 80% of their time in conversation. "Talk" is our key action tool - and often a neglected discipline. Changing the nature of conversations in organisations may be the single most powerful way to bring about performance breakthroughs.

Based on the pioneering work of Bill Isaacs, this three day workshop is designed to deepen your leadership identity and expand your capacity to connect with others and access collective intelligence in groups. The programme is highly participative, and will introduce you to the tools and frameworks of a dialogic approach - in a practical way.

AN INVITATION TO YOU

Make “The Art of Thinking Together” a powerful experience to develop your leadership. We focus in the following areas:

- *What helps, and what gets in the way, of developing successful cross-team solutions*
- *How to create the conditions for open engagement in critical conversations to enable powerful outcomes*
- *Understanding your leadership style, in order to engage others and deepen your natural leadership effectiveness.*
- *Using breakdowns to break through and generate pivotal conversations and actions.*

The programme uses a variety of learning methods including short presentations, large group dialogues, small group reflection, reading, video and journaling. There is an orientation call prior to the program and a one-hour coaching call with a member of the faculty after the program to maximize your learning.
